

**Tightnik**  
Anti-Rust model

# Not loosen, Follows, Rust-resistant !

Follows the shrinkage of wood and other materials over time and does not loosen. Resistant to vibration and withstands large forces with low-torque tightening force. Rust-proof finish allows outdoor use.

Applicable Bolts are M12, M8

Passed NAS 3350 based test with 30Nm tightening torque

## FEATURES

### 1. High anti-loosening effect

The wedge effect of the magic ring and the power of the built-in spring attract the bolt and follow wood shrinkage, creating a powerful loosening prevention effect.

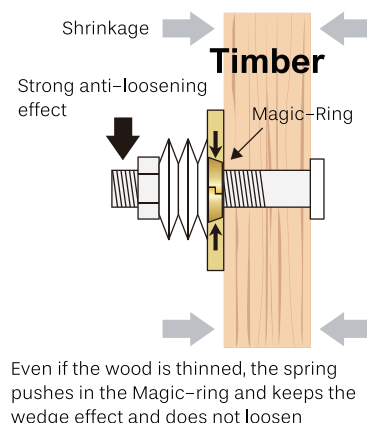

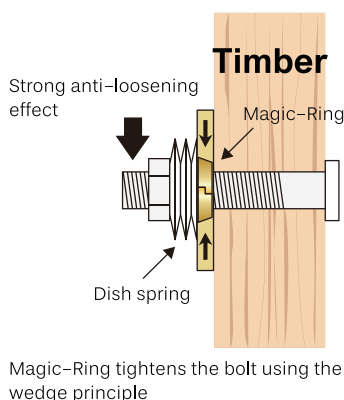

### 2. Tightened by vibration

Vibration is converted into a tightening force of the magic ring and does not loosen.

### 3. Can be used outdoors

Rust-resist, can be used outdoors because of rust-proofing finish.

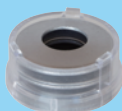

## MECHANISM

## LINEUP

Product name : **TIGHTNIK**

Product No. :

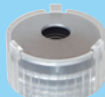

**TZ12SES-1-R**

for M12 bolt, for wood/metal, follow width 4mm

**T-8S-1M25**

Launch soon,  
for M8 bolt, for metal, follow width 2mm

**T-8S-1W29**

Launch soon,  
for M8 bolt, for WOOD, follow width 4mm
